Query CSQ Table? Jun 14, 2018 2:56 PM

Hi all,

In the call events, I can see the CSQID, and I would like to get the CSQName for that CSQID. Is there a CSQ Table which contains the CSQID and the corresponding CSQName? I looked into the CONFIG_CSQ_EVENT, but it seems like it only gives me the CSQID and CSQName when a CSQ entry is added or updated.

Thank you
