# Play the Cisco Mars Network Challenge

We're on a mission to build the first sustainable base on Mars, 225 million kilometers from Earth. The network is absolutely vital. Your role is to set it and keep it running smoothly.

- You will encounter sudden and unexpected threats.
- You will work with the most advanced network ever built.
- Constantly learning. Constantly adapting. Constantly protecting.

We call it

The Network.

Intuitive.

The success of the mission lies in your hands.
