

Meeting Room Video Endpoints options (for both on-premises and Webex cloud):

a) All-in-one (codec, camera, displays, speakers)

In case you want all-in-one approach. There are various options: single or dual screens, floor/wheel or wall mounting, speakertrack feature. Some models have also integrated microphones. All models support speaker track function via their digital camera.

In this category, we have :

Room 55 (one 55" display) for small/medium rooms

[Cisco Webex Room 55 Data Sheet](#)

Room 55 Dual (two 55" displays) for medium/large rooms

[Cisco Webex Room 55 Dual Data Sheet](#)

Room 70 G2 Single (one 70" display) for medium/large rooms

[Cisco Webex Room 70 G2 Data Sheet](#)

Room 70 G2 Dual (dual 70" display) for medium/large rooms

[Cisco Webex Room 70 G2 Data Sheet](#)

b) Integration Codec (connects to external display or projector)

In case you want to use to existing display or projector.

In this category, we have :

Room Kit Mini for small rooms

[Cisco Webex Room Kit Mini Data Sheet](#)

Room Kit Mini has one HDMI output for display connection. Comes by default with touch panel. Has integrated speakers and microphones (no external microphones supported). Includes USB to plug your laptop and use Room Kit Mini as your laptop's camera, speakers, microphones (for skype, facebook,etc.)

Room Kit for small/medium rooms

[Cisco Webex Room Kit Data Sheet](#)

Room kit has two HDMI outputs for display connection (one for video and one for presentation). Comes by default with touch panel. It supports by default speaker track (optimum use for rooms up to 6m). Has integrated speakers and microphones (also supports external microphones).

Room Kit Plus for medium/large rooms

[Cisco Webex Room Kit Plus Data Sheet](#)

This package offers Room kit Plus codec + Quad Camera. It provides two HDMI outputs for display connection (one for video and one for presentation). Comes by default with touch panel. Quad Camera supports speaker track feature (optimum use for rooms up to 10m). Has integrated speakers. It requires external microphones.

Room Kit Plus with Precision 60 camera for medium/large room

[Cisco Webex Room Kit Plus Precision 60 Integrator Package Data Sheet](#)

Offers same features as above Room Kit Plus package(HDMI, speakerphones, ext microphones,etc) but in this package we have Room Kit Plus codec + P60 camera instead of Quad camera. Main difference from standard Room Kit Plus offering is that Precision 60 camera provides maximum flexibility in scenarios where you need special camera placement, objects close up, or wide pan/tilt/zoom capability. But it does not support Speakertrack feature.

Note: Room Kit Plus is a codec that can be combined as seen above with Quad Camera or P60 camera (these are the options seen above) or ST60 camera (not described here) or even a combination of these cameras. Speakertrack feature is offered with Quad Camera and ST60 camera options.

Room Kit Pro codec for large rooms/customized room designs **[Cisco Webex Room Kit Pro Data Sheet](#)**

Room Kit Pro could be combined with various cisco cameras (Quad camera, Precision 60, SpeakerTrack 60) to cover challenging scenarios. It provides best flexibility for HDMI and audio connections and integrations. It also offers Speakertrack (with Quad camera or Speakertrack60) and Presenter Track feature (with P60 camera).

IMPORTANT NOTE:

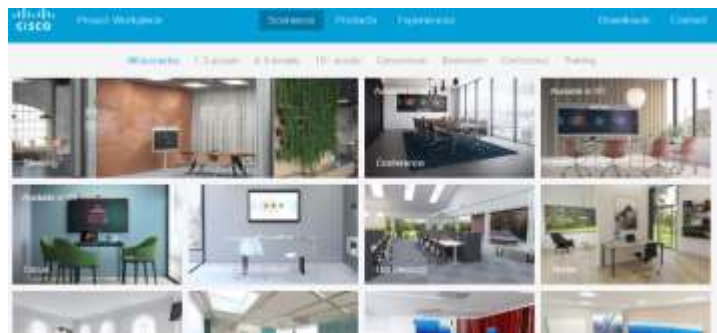

All above endpoints support SIP and H323 and support registration on-premises (Cisco Communications Manager(CUCM)/BE6k or VCS-Control or Expressway-C) or registration on Webex cloud.

The only video endpoint that is not supported in both environments today is Webex Board. Webex Board is supported only in Webex cloud. Webex Board is not covered in this document.
